

# Journey

Introducing the Journey, a nesting option that provides exceptional style and value. Set on two tubular Y bases, the worksurface pivots and locks into place on an aluminum extruded column. The column does more than serve as a hinge for the top and a stretcher bar for the bases. It provides built-in wire management. With four heavy-duty casters standard, two locking and two non-locking, the Journey works well in a school, training facility, hospital or religious center. The Journey comes standard in a silver powder-coated finish, but other colors are available.

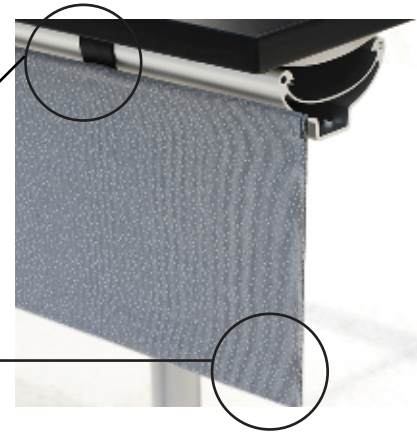

## Key Features:

- Columns offset to allow for in-line nesting
- All steel construction for maximum strength
- Single-handle release mechanism
- Locks in nesting and upright positions

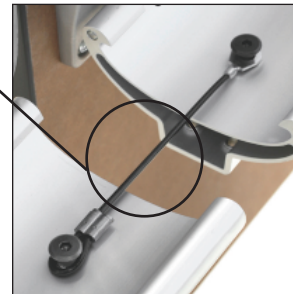

Plastic clips make for easy installation and removability.

Fabric modesty panel is available in silver or black and includes a Velcro pouch for wire management

Simple table connector, can be used when tables are powered.

End caps available for list to add a finished look to the Journey product.

## Recommended Power Option

With two power, two data and a convenience plug standard, Surfacetech's link box is the perfect option for nesting tables. Other Surfacetech power options are available.
